PROFILE

People Analytics and Data Statistics professional with over 12 years of experience in both corporate and academia including Nestlé, McKinsey, BCG, Micron and University of York. Experienced in workforce analytics, organization diagnostics, benchmarking, statistical modeling, predictive model testing, dashboarding, and consulting-style insight generation. Strong background in creating clean datasets, statistical analysis, decision models, and senior-stakeholder recommendations using data related to organization, talent, workforce, and operating-models.

CORE SKILLS & LIVE PROJECTS (People Analytics Lab - click the hexagon to view projects)

EXPERIENCE

Professor of Practice – Computer Science
UPES, India

Aug 2024 – Present

- Developed applied analytics labs using Python, SQL, statistics, predictive modeling, dashboards, and case-based datasets to build student readiness for practical analytics roles.
- Created a public portfolio platform connecting workforce planning, model validation, benchmarking, and organization diagnostics to business use cases.

Innovation Lead / Data Scientist – Global People Analytics
Nestlé, UK & India

Aug 2021 – Aug 2024

- Developed workforce analytics and attrition-risk decision support using statistical modeling, cohort analysis, segmentation, dashboards, and reusable HR data structures.
- Built causal-intervention style analysis for people-risk themes such as retention, manager actions, workload pressure, mobility, and planning interventions to support evidence-based HR decisions.
- Standardized people-data definitions, quality checks, and analytical workflows, converting recurring HR questions into reusable views for planning, payroll insights, and workforce-risk monitoring.
- Translated model outputs into senior-stakeholder narratives, enabling earlier identification of workforce-risk patterns and movement from manual reporting to decision-support analytics.

Marie-Curie Early Stage Researcher – Data Statistics & Decision Systems
University of York, UK

May 2019 – Aug 2021

- Developed Bayesian and uncertainty-aware statistical methods for model assurance, reliability analysis, predictive confidence, and responsible AI evaluation in decision systems.
- Published peer-reviewed work on uncertainty-aware decision-making and applied predictive modeling, strengthening externally funded research outputs in safe autonomous systems.

Data Scientist – Predictive Analytics
Micron, Japan

Aug 2017 – Nov 2018

- Built predictive fault-detection and yield-analysis models using Python, SQL, Spark/PySpark, feature engineering, and classification workflows for manufacturing decision support.
- Integrated fabrication and enterprise datasets to identify process drivers, throughput patterns, equipment signals, and operational improvement opportunities.

Analyst – Practice Analytics & Benchmarking
Boston Consulting Group, India

Apr 2015 – Aug 2016

- Built and maintained benchmarking datasets, analytical formulas, output sheets, and proprietary model inputs to support consulting casework, proposals, and market-estimation assets.
- Automated recurring benchmark analysis and client-ready insight outputs using structured data checks, reusable calculation logic, and standardized reporting templates.

Analyst – Corporate & Business Function Benchmarking
McKinsey & Company, India

Nov 2012 – Mar 2015

- Developed FTE diagnostics, cost benchmarks, productivity ratios, outsourcing models, shared-services inputs, and M&A synergy analysis across HR, Finance, IT, Legal, Procurement, Sales Support, and Marketing.
- Applied functional benchmarking, location-cost analysis, span/layer review, and operating-model diagnostics to identify cost reduction, centralization, outsourcing, and service-delivery redesign levers.

VBA / Analytics Automation Developer
Brochet, UK

Jul 2011 – Jul 2012

- Developed Excel, Word, Access, and SQL Server automation using VBA, VSTO, XML, templates, and reusable business logic for reporting and document-production workflows.
- Built standardized templates, data-preparation routines, testing procedures, and client-site deployment support to reduce manual reporting and document preparation effort.

EDUCATION

Professional Certificate in Data Science, University of Oxford, UK
M.Sc. Computer Science, University of Southampton, UK
B.Tech. Electronics & Communication, Chitkara University, India

2017
2009 – 2010
2005 – 2009
