PROFILE

Data Science and AI leader with 12+ years of experience across Nestlé, McKinsey, BCG, Micron, and academia. Experienced in predictive modeling, workforce analytics, cloud data platforms, APIs, and BI solutions using Python, SQL, Snowflake, Azure, and machine learning tools to support enterprise decision-making.

CORE SKILLS

Data Science & ML: Predictive Modeling, Classification, Regression, Attrition Modeling, Statistical Analysis, Model Evaluation, NLP, Sentiment Analysis

Programming: Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, Feature Engineering

Data Platforms & Engineering: Snowflake, Azure, AWS, ETL Pipelines, APIs, Data Quality

Visualization: Power BI, Tableau, Streamlit, Executive Dashboards

EXPERIENCE

Professor of Practice – Computer Science Aug 2024 – Present
UPES Dehradun

- Deliver project-based courses in Data Architecture, Snowflake, Big Data, pipelines, APIs, and cloud deployment.
- Mentor students on end-to-end analytics system design and applied data science projects.

Innovation Lead – Data & AI, Global People Analytics Mar 2023 – Aug 2024
Nestlé HQ Gurugram

- Delivered workforce intelligence solutions for enterprise HR decisions across attrition, payroll insights, and planning.
- Built Azure-based analytics products and improved governance, data quality, and scalable delivery practices.

Data Scientist – Full Stack, People Analytics Aug 2021 – Apr 2023
Nestlé UK York

- Developed analytics solutions spanning ingestion, modeling, APIs, dashboards, and workforce decision support.
- Built predictive models for attrition and workforce behavior, plus dashboards for planning and engagement insights.

Marie-Curie Early Stage Researcher May 2019 – Aug 2021
University of York York

- Developed Bayesian AI models for uncertainty-aware decision systems and predictive analytics.
- Published research in SafeAI 2021 and EAI 2021 on autonomous systems and applied clinical AI.

Data Scientist – Data Platforms Aug 2017 – Nov 2018
Micron Japan

- Built Spark-based pipelines and predictive models to improve yield, throughput, and operational decision-making.
- Integrated manufacturing and enterprise datasets to identify productivity and process improvement drivers.

Earlier Experience 2012 – 2016

Boston Consulting Group; McKinsey & Company

- Built analytics tools for workforce strategy, market assessment, productivity benchmarking, and enterprise efficiency.

SELECTED WORK

Global People Analytics Platform – Nestlé: Built workforce analytics solutions supporting enterprise HR decision-making.

Enterprise Analytics Platform – Nestlé HQ: Designed scalable Azure-based analytics architecture with CI/CD pipelines.

EDUCATION

M.Sc. Computer Science, University of Southampton 2009 – 2010

B.Tech. Electronics & Communication, Chitkara University 2005 – 2009

CERTIFICATION

Data Science for IoT, University of Oxford 2017
